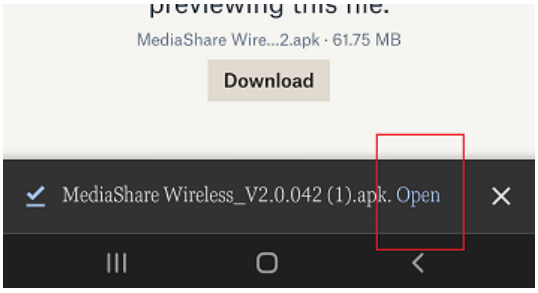
Verbatim® MediaShare Wireless

In order to download the latest version of the Verbatim® MediaShare Wireless software, please follow these steps:

1. On your Android mobile device, enable downloads from 3rd parties.
    a. For Samsung devices:
        i. Go to your device's **Settings.**
        ii. Go to **Biometrics and security** then select **Install unknown apps.**
        iii. Select the browser application (eg. Chrome or Firefox) you will use for the software download and installation.
        iv. Tap the toggle button to enable.
    b. For other devices:
        i. Go to your device's **Settings.**
        ii. Go to **Security & privacy** then select **More settings.**
        iii. Select **Install apps from external sources.**
        iv. Select the browser application (eg. Chrome or Firefox) you will use for the software download and installation.
        v. Toggle **Allow app installs** on.
2. Using the browser you chose in step 1, navigate to: https://www.verbatim.com/index/support.php?lang_id=1&cat=9&action=supportitems&pid=66869. Tap on the software download link.
3. Once the download is complete, the browser should display a notification window at the bottom. Tap **Open** to open the file (example shown below).



If you do not see the **Open** notification as described above, navigate to your device's **My Files** and then **Installation Files** (example shown below). Find the downloaded file and tap it.

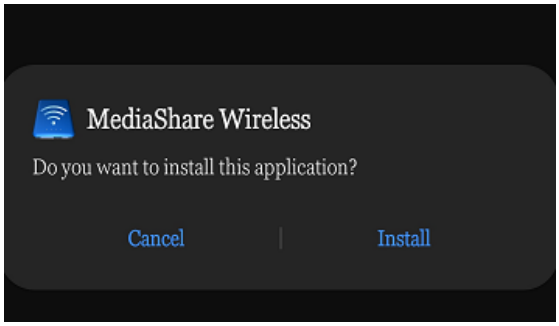
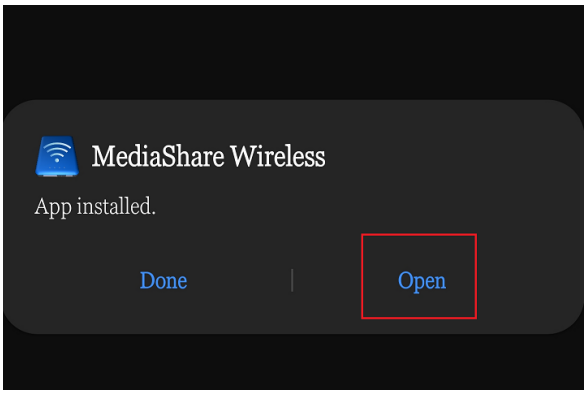
4. A popup will ask if you want to install the application (example shown below). Tap **Install**.



5. After the installation is complete, tap **Open** (example shown below).



6. Enable the necessary permissions (example shown below) and proceed to use your MediaShare Wireless application normally.
